

The Junkmakers

Albert Teichner

The lower half of the image features a vibrant green background. Overlaid on this background are several thick, solid blue lines. These lines are arranged in a complex, abstract pattern. Some lines are straight, while others are curved, creating a sense of movement and depth. The lines intersect and overlap, forming a series of interconnected shapes that resemble a stylized, abstract figure or a network of paths. The overall effect is a bold, graphic design that contrasts sharply with the white text above.

THE JUNKMAKERS

BY ALBERT TEICHNER

ERIC WAS THE BEST ROBOT THEY'D EVER HAD—
PERFECTLY TRAINED, EVER THOUGHTFUL, A JOY TO
OWN. NATURALLY THEY HAD TO DESTROY HIM!

I

W

endell Hart had drifted, rather than plunged, into the underground movement. Later, discussing it with other members of the Savers' Conspiracy, he found they had experienced the same slow, almost casual awakening. His own, though, had come at a more appropriate time, just a few weeks before the Great Ritual Sacrifice.

The Sacrifice took place only once a decade, on High Holy Day at dawn of the spring equinox. For days prior to it joyous throngs of workers helped assemble old vehicles, machine tools and computers in the public squares, crowning each pile with used, disconnected robots. In the evening of the Day they proudly made their private heaps on the neat green lawns of their homes. These traditionally consisted of household utensils, electric heaters, air conditioners and the family servant.

The wealthiest—considered particularly blessed—even had two or three automatic servants beyond the public contribution, which they destroyed in private. Their more average neighbors crowded into their gardens for the awesome festivities. The next morning everyone could return to work, renewed by the knowledge that the Festival of Acute Shortages would be with them for months.

Like everyone else, Wendell had felt his sluggish pulse gaining new life as the time drew nearer.

A cybernetics engineer and machine tender, he was down to ten hours a week of work. Many others in the luxury-gorged economy had even smaller shares of the purposeful activities that remained. At night he dreamed of the slagger moving from house to house as it burned, melted and then evaporated each group of junked labor-blocking devices. He even had glorious daydreams about it. Walking down the park side of his home block, he was liable to lose all contact with the outside world and peer through the mind's eye alone at the climactic destruction.

Why, he sometimes wondered, are all these things so necessary to our

resurrection?

Marie had the right answer for him, the one she had learned by rote in early childhood: "All life moves in cycles. Creation and progress must be preceded by destruction. In ancient times that meant we had to destroy each other; but for the past century our inherent need for negative moments has been sublimated—that's the word the news broadcasts use—into proper destruction." His wife smiled. "I'm only giving the moral reason, of course. The practical one's obvious."

Obvious it was, he had to concede. Men needed to work, not out of economic necessity any more but for the sake of work itself. Still a man had to wonder...

H

e had begun to visit the Public Library Archives, poring over musty references that always led to maddeningly frustrating dead ends. For the past century nothing really informative seemed to have been written on the subject.

"You must have government authorization," the librarian explained when he asked for older references. Which, naturally, made him add a little suspicion to his already large dose of wonder.

"You're tampering with something dangerous," Marie warned. "It would make more sense for you to take long-sleep pills until the work cycle picks up."

"I *will* get to see those early references," he said through clenched teeth.

He did.

All he had needed to say at the library was that his work in sociology required investigation of some twentieth century files. The librarian, a tall, gaunt man, had given him a speculative glance. "Of course, you don't have government clearance.... But we get so few inquiries in sociology that I'm willing to offer a little encouragement." He sighed. "Don't get many inquiries altogether. Most people just can't stand reading. You might be interested to know this—one of the best headings to research in sociology is *Conspicuous consumption*."

Then it was Wendell's turn to glance speculatively. The older man, around a healthy hundred and twenty-five, had a look of earnest dedication about him that

commanded respect as well as confidence.

"Conspicuous consumption? An odd combination of words. Never heard of that before. I will look it up."

The librarian was nervous as he led his visitor into a reference booth. "That's about all the help I can offer. If anything comes up, just ring for me. Burnett's the name. Uh—you won't mention I put you on the file without authorization, I hope."

"Certainly not."

As soon as he was alone he typed *Conspicuous consumption* into the query machine.

It started grinding out long bibliographical sheets as well as cross-references to *Obsolescence, Natural; Obsolescence, Technological; Obsolescence, Planned*, plus even odder items such as *Waste-making, Art of and Production, Stimulated velocity of*. How did such disparate subjects tie in with each other?

B

y the end of the afternoon he began to see, if only dimly, to what the unending stream of words on the viewer pointed.

For centuries ruling classes had made a habit of conspicuously wasting goods and services that were necessities for the mass of men. It was the final and highest symbol of social power. By the time of Louis XIV the phenomenon had reached its first peak. The second came in the twentieth century when mass production permitted millions to devote their lives to the acquisition and waste of non-essentials. Hart's twenty-second century sensibilities were repelled by the examples given. He shuddered at the thought of such anti-social behavior.

But a parallel development was more appealingly positive in its implications. As the technological revolution speeded up, devices were superseded as soon as produced. The whole last half of the 1900's was filled with instances where the drawing board kept outstripping the assembly line.

Hart remembered this last change from early school days but the later, final

development was completely new and shocking to him. Advertising had pressured more and more people to replace goods *before* they wore out with other goods that were, essentially, no improvement on their predecessors! Eventually just the word "NEW" was enough to trigger buying panics.

There had been growing awareness of what was happening, even sporadic resistance to it by such varied ideologies as Conservative Thrift, Asocial Beatnikism and Radical Inquiry. But, strangely enough, very few people had cared. Indeed, anything that diminished consumption was viewed as dangerously subversive.

"And rightly so!" was his first, instinctive reaction. His second, reasoned one, though, was less certain.

The contradiction started to give him a headache. He hurried from the scanning room, overtaxed eyes blinking at the rediscovery of daylight.

Burnett walked him to the door. "Not feeling well?" he inquired.

"I'll be all right. I just need a few days real work." He stopped. "No, that's not why. I'm confused. I've been reading crazy things about obsolescence. They used to have strange reasons for it. Why, some people even said replacements were not always improvements and were unnecessary!"

Burnett could not completely hide his pleasure. "You've been getting into rather deep stuff."

"Deep—or nonsensical!"

"True. True. Come back tomorrow and read some more."

"Maybe I will." But he was happy to get away from the library building.

Marie was horrified when he told her that evening about his studies. "Don't go back there," she pleaded. "It's dangerous. It's subversive! How could people say such awful things? You remember that Mr. Johnson around the corner? He seemed such a nice man, too, until they arrested him without giving a reason ... and how messed up he was when he got out last year. I'll bet that kind of talk explains the whole thing. It's crazy. Everyone knows items start wearing out and they have to be replaced."

"I realise that, honey, but it's interesting to speculate. Don't we have guaranteed

freedom of thought?"

She threw up her hands as if dealing with a child. "Naturally we have freedom of thought. But you should have the right thoughts, shouldn't you? Wendell, promise me you won't go back to that library."

"Well—"

"Reading's a very risky thing anyway." Her eyes were saucer-round with fright. "Please, darling. Promise."

"Sure, you're right, honey. I promise."

H

e meant it when he said it. But that night, tossing from side to side, he felt less certain. In the morning, as he went out, Marie asked him where he was going.

"I want to observe the preparations for the Preliminary Rites."

"Now that," she grinned, "is what I call *healthy* thinking."

For a while he did stand around the Central Plaza along with thousands of other idlers, watching the robot dump trucks assemble the piles of discarded equipment. The crowd cheered loudly as an enormous crane was knocked over on its side.

"There's fifty millions worth out there!" a bystander exulted. "It's going to be the biggest Preliminary I've ever seen."

"It certainly will be!" he said, catching a little of the other man's enthusiasm despite his previous doubts.

Preliminary Rites were part of the emotion-stoking that preceded the Highest Holy Day. Each Rite was greater and more destructive than those that had gone before. As tokens of happy loyalty, viewers threw hats and watches and stickpins onto the pile just prior to the entry of the slagers. What better way could be found for each man to manifest his common humanity?

After a while doubt started assailing him again, and Hart found himself returning

almost against his will to the Library Building. Burnett greeted him cordially. "To-day's visit is completely legal," he said. "Anyone doing olden time research is automatically authorized if he has been here before."

"I hope my thought can be as legal," Hart blurted out. "Well—that was just a joke."

"Oh, I can recognize a joke when I hear one, my friend."

Hart went to his booth, feeling the man's eyes measuring him more intently than ever. It was almost a welcome relief to start reading the reference scanner once more.

But not for long. As the wider pattern unfolded, his anxiety state intensified.

It was becoming perfectly obvious that many, many replacements used to be made long before they were needed. And it was still true. *I should not be thinking such thoughts*, he told himself, *I should be outside in the Plaza, being normal and human.*

But he could see how it had come about, step by step. First there had been pressure from the ruling echelons, many of whose members only maintained their status through excessive production. Then, much more important, there had been the willful blindness of the masses who wanted to keep their cozy, familiar treadmills going.

He slammed down the *off* button and went out to the librarian's desk. "Do people want to work all the time," he said, "for the sake of work alone?"

He immediately regretted the question. But Burnett did not seem to mind. "You've only stated the positive reason, Mr. Hart. The negative one could be stronger—the fear of what they would have to do if they did not have to work much over a long period."

"What would it mean?"

"Why, they would have to start thinking! Most people don't mind thought if it's concentrated in a narrow range. But if they have to think in a broad range to keep boredom away—no, that's too high a price for most of them! They avoid it when they can. And under present circumstances they can." He stopped. "Of course that's a purely hypothetical fiction I'm constructing."

Hart shook his head. "It sounds awfully real to be purely—" He, too, caught himself up. "Of course, you're only positing a fiction."

Burnett started putting his desk papers away. "I'm leaving now. The Preliminary begins soon. Want to come?"

The man's face was stolidly blank except for his brown eyes which burned like a zealot's. Fascinated by them, Hart agreed. It would be best to return anyway. Some of the bystanders had looked too curiously at him when he had left. Who would willingly leave a Rite when it was approaching its climax?

II

T

he Plaza was now thronged and the sacrificial pile towered over a hundred feet in the cleared center area. Then, as the first collective *Ah!* arose, a giant slagger lumbered in from the east, the direction prescribed for such commencements. Long polarity arms glided smoothly out of the central mechanism and reached the length for Total Destruction.

"That's the automatic setting," parents explained to their children.

"When?" the children demanded eagerly.

"Any moment now."

Then the unforeseen occurred.

There was a rumbling from inside the pile and a huge jagged patchwork of metal shot out, smashing both arms. The slagger teetered, swaying more and more violently from side to side until it collapsed on its side. The rumbling grew. And then the pile, like a mechanical cancer, ripped the slagger apart and then absorbed it.

The panicking crowd fell back. Somewhere a child began crying, provoking more hubbub. "Sabotage!" people were crying. "Let's get away!"

Nothing like this had ever happened before. But Hart knew instantly what had caused it. Some high-level servo mechanisms had not been thoroughly disconnected. They had repaired their damages, then imposed their patterns on the material at hand.

A second slagger came rushing into the square. It discharged immediately; and the pile finally collapsed and disintegrated as it was supposed to.

The crowd was too shocked to feel the triumph it had come for, but Hart could not share their horror. Burnett eyed him. "Better look indignant," he said. "They'll be out for blood. Somebody must have sabotaged the setup."

"Catch the culprits!" he shouted, joining the crowd around him. "Stop anti-social

acts!"

"Stop anti-social acts!" roared Burnett; and, in a whisper: "Hart, let's get out of here."

As they pushed their way through the milling crowd, a loudspeaker boomed out: "Return home in peace. The instincts of the people are good. Healthy destruction forever! The criminals will be tracked down ... if they exist."

"A terrible thing, friend," a woman said to them.

"Terrible, friend," Burnett agreed. "Smash the anti-social elements without mercy!"

Three children were clustered together, crying. "I wanted to set the right example for them," said the father to anyone who would listen. "They'll *never* get over this!"

Hart tried to console them. "Next week is High Holy Day," he said, but the bawling only increased.

The two men finally reached a side avenue where the crowd was thinner. "Come with me," Burnett ordered, "I want you to meet some people."

H

e sounded as if he were instituting military discipline but Hart, still dazed, willingly followed. "It wasn't such a terrible thing," he said, listening to the distant uproar. "Why don't they shut up!"

"They will—eventually." Burnett marched straight ahead and looked fixedly in the same direction.

"The thing could have gobbled up the city if there hadn't been a second slagger!" said a lone passerby.

"Nonsense," Burnett muttered under his breath. "You know that, Hart. Any self-regulating mechanism reaches a check limit sooner than that."

"It has to."

They turned into a large building and went up to the fiftieth floor. "My apartment," said Burnett as he opened the door.

There were about fifteen people in the large living room. They rose, smiling, to greet their host. "Let's save the self-congratulations for later," snapped Burnett. "These were merely our own preliminaries. We're not out of the woods yet. This, ladies and gentlemen, is our newest recruit. He has seen the light. I have fed him basic data and I'm sure we're not making a mistake with him."

Hart was about to demand what was going on when a short man with eyes as intense as Burnett's proposed a toast to "the fiasco in the Plaza." Everyone joined in and he did not have to ask.

"Burnett, I don't quite understand why I am here but aren't you taking a chance with me?"

"Not at all. I've followed your reactions since your first visit to the library. Others here have also—when you were completely unaware of being observed. The gradual shift in viewpoint is familiar to us. We've all been through it. The really important point is that you no longer like the kind of world into which you were born."

"That's true, but no one can change it."

"We *are* changing it," said a thin-faced young woman. "I work in a servo lab and —."

"Miss Wright, time enough for that later," interrupted Burnett. "What we must know now, Mr. Hart, is how much you're willing to do for your new-found convictions? It will be more work than you've ever dreamed possible."

He felt as exhilarated as he did in the months after High Holy Day. "I'm down to under ten hours labor a week. I'd do anything for your group if I could get more work."

Burnett gave him a hearty handshake of congratulation ... but was frowning as he did so. "You're doing the right thing—for the wrong reason. Every member of this group could tell you why. Miss Wright, since you feel like talking, explain the matter."

"Certainly. Mr. Hart, we are engaged in an activity of so-called subversion for a positive reason, not merely to avoid insufficient work load. Your reason shows

you are still being moved by the values that you despise. We *want* to cut the work-production load on people. We want them to *face* the problem of leisure, not flee it."

"There's a heart-warming paradox here," Burnett explained. "Every excess eventually undermines itself. Everybody in the movement starts by wanting to act for their beliefs because work appears so attractive for its own sake. I was that way, too, until I studied the dead art of philosophy."

"Well—" Hart sat down, deeply troubled. "Look, I deplore destroying equipment that is still perfectly useful as much as any of you do. But there *is* a problem. If the destruction were stopped there would be so much leisure people would rot from boredom."

B

urnett pounced eagerly on the argument. "Instead they're rotting from artificial work. Boredom is a temporary, if recurring phenomenon of living, not a permanent one. If most men face the difficulty of empty time long enough they find new problems with which to fill that time. That's where philosophy showed me the way. None of its fundamental mysteries can ever be solved but, as you pit yourself against them, your experience and capacity for being alive grows."

"Very nice," Hart grinned, "wanting all men to be philosophers. They never have been."

"You shouldn't have brought him here," growled the short man. "He's not one of us. Now we have a real mess."

"Johnson, I'm leader of this group!" Burnett exploded. "Credit me with a little understanding. All right, Hart, what you say is true. But why? Because most men have always worked too hard to achieve the fruits of curiosity."

"I hate to keep being a spoil-sport, but what does that prove? *Some* men who had to work as hard as the rest have been interested in things beyond the end of their nose."

They all groaned their disapproval.

"A good point, Hart, but it doesn't prove what you think. It just shows that a minority enjoy innate capacities and environmental variations that make the transition to philosopher easier."

"And *you* haven't proven anything about the incurious majority."

"This does, though: whenever there was a favorable period the majority who could, as you put it, see beyond the ends of their noses increased. Our era is just the opposite. We are trapped in a vicious circle. Those noses are usually so close to the grindstone that men are afraid to raise their heads. We are breaking that circle!"

"It's a terribly important thing to aim for, Burnett, but—" He brought up another doubt and somebody else answered it immediately.

For the next half hour, as one uncertainty was expressed after another, everybody joined in the answers until inexorable logic forced his surrender.

"All right," he conceded, "I will do anything I can—not to make work for myself, but to help mankind rise above it."

E

xcept for a brief, triumphant glance in Johnson's direction, Burnett gave no further attention to what had happened and plunged immediately into practical matters.

To halt the blind worship of work, the Rites had first to be discredited. And to discredit the Rites, the awe inspired by their infallible performance had to be weakened. The sabotage of the Preliminary had been the first local step in that direction. There had been a few similar, if smaller, episodes, executed by other groups, but they had received as little publicity as possible.

"Johnson, you pulled one so big this time that they can't hide it. Twenty thousand witnesses! When it comes to getting things done you're the best we have!"

The little man grinned. "But you're the one who knows how to pick recruits and organize our concepts. This is how it worked. I re-fed the emptied cryotron memory box of a robot discard with patterns to deal with anything it was likely

to encounter in a destruction pile. I kept the absolute-freeze mechanism in working order, but developed a shield that would hide its activity from the best pile detector." He spread a large tissue schematic out on the floor and they all gathered around it to study the details. "Now, the important thing was to have an external element that could resume contact with a wider circuit, which could in turn start meshing with the whole robot mechanism and then through that mechanism into the pile. This little lever made the contact at a pre-fed time."

Miss Wright was enthusiastic. "That contact is half the size of any I've been able to make. It's crucially important," she added to Hart. "A large contact can look suspicious."

While others took miniphotos of the schematic, Hart studied the contact carefully. "I think I can reduce its size by another fifty per cent. Alloys are one of my specialties—when I get a chance to work at them."

"That would be ideal," said Burnett. "Then we could set up many more discarded robots without risk. How long will it take?"

"I can rough it out right now." He scribbled down the necessary formulas and everyone photographed that too.

"Maximum security is now in effect," announced Burnett. "You will destroy your copies as soon as you have transferred them to edible base copies. At the first hint of danger you will consume them. Use home enlargers for study. In no case are you to make permanent blowups that would be difficult to destroy quickly." He considered them sternly. "Remember, you are running a great risk. You're not only opposing the will of the state but the present will of the vast majority of citizens."

"If there are as many other underground groups as you indicate," said Hart, "they should have this information."

"We get it to them," answered Burnett. "I'm going on health leave from my job."

"And what will be your excuse?" Wright demanded anxiously.

"Nervous shock," smiled their leader. "After all, I did see today's events in the Plaza."

W

hen Hart reached home his wife was waiting for him. "Why did you take so long, Wendell. I was worried sick. The radio says anti-socials are turning wild servos loose. How could human beings do such a thing?"

"I was there. I saw it all happen." He frowned. "The crowd was so dense I couldn't get away."

"But what happened? The way the news was broadcast I couldn't understand anything."

He described the situation in great detail and awaited Marie's reaction. It was even more encouraging than he had hoped for. "I understand less than before! How could anything reactivate that rubble? They put everything over five years old into the piles, and the stuff's supposed to be decrepit already. You'd almost think we were destroying wealth before its time, because if those disabled mechanisms reactivate—" She came to a dead halt. "That's madness! Oh, I wish High Holy Day were here already so I could get back to work and stop this empty *thinking!*"

Her honest face was more painfully distorted than he had ever seen it before, even during the universal pre-Rite doldrums. "Only a few more days to go," he consoled. "Don't worry, honey. Everything's going to be all right. Now I'd like to be alone in the study for a while. I've been through an exhausting time."

"Aren't you going to eat?"

The last word triggered the entry of Eric, the domestic robot, pushing the dinner cart ahead of him. "No food to-night," Hart insisted. The shining metal head nodded its assent and the cart was wheeled out.

"That's not a very humane thing to do," she scolded. "Eric's not going to be serving many more meals—"

"Good grief, Marie, just leave me alone for a while, will you?" He slammed the study door shut, warning himself to display less nervousness in the future as he listened to her pacing outside. Then she went away.

The projector gave him a good-sized wall image to consider. He spent most of the night calculating where he could place tiny self-activators in the "obsolescent" robots that were to be donated by his plant. Then he set up the

instruction tapes to make the miniature contacts. Production then would be a simple job, only taking a few minutes, and during a working day there were always many periods longer than that when he was alone on the production floor.

But thinking the matter out without computers was much more difficult. Human beings ordinarily filled their time on a lower abstracting level.

When he unlocked the study door in the morning he was startled to see Marie bustling down the corridor, pushing the food service cart herself. That did not make sense, especially considering last night's statement about Eric.

"I thought you'd want breakfast early," she coughed.

"You didn't have to bother, honey. Eric could have done it."

If she had been prying, the cart might have been a prop to take up as soon as he came out. On the other hand, what could she in her technical ignorance make of such matters anyway?

It was best not to rouse any deeper suspicions by openly noticing her wifely nosiness. At breakfast they pretended nothing had happened, devoting the time to mutually disapproved cousins, but all day long he kept wondering whether ignorant knowledge couldn't be as dangerous as the knowing kind.

T

he next morning, after a long sleep, he went to the factory for the first of his semi-weekly work periods.

He sat before a huge console, surveying scores of dials, at the end of a machine that was over five hundred yards long. Today it was turning out glass paper the color of watered blood, made only for Ritual publications, packing it in sheets and dispatching them in automatic trucks; but the machine could be adjusted to everything from metal sheeting to plastic felts. At the far end sat another man, diminished by distance, busily tending more dials that could really take care of themselves.

After a while the man went out for a break. Hart ran a hundred yards to a section that was not working. He snapped it into the alloy supply and fed in the tape. In

a minute, several dozen tiny contacts came down a chute. He pocketed them and disconnected the section just before his fellow worker reappeared.

The man walked down the floor to him, looking curious.

"Anything the matter?" he asked, hopeful for some break in routine.

"No, just felt like a walk."

"Know what you mean—I feel restless too. Too bad this plant's only two years old. Boy, wouldn't she make a great disintegration!" He grinned, slapping a fender affectionately.

Hart joined in the joke. "Gives us something to look forward to in ten years."

"A good way to look at things," said the other man.

At home he locked the contacts in a desk drawer. Tomorrow he would deliver most of them to Burnett's apartment.

But the next morning an emergency letter came from his group leader, warning him not to appear there. *I am going completely underground. I think they may suspect my activities. The dispersion plan must go into effect. You know how to reach Johnson and Wright and they each in turn can get to two others. Good luck!*

He had just put the letter in his pocket when Eric announced the arrival of a Rituals Inspector.

The man had nervous close-set eyes and seemed embarrassed by his need to make such a visit. Hart took the offensive as his best defense. "I don't understand this, Inspector," he protested. "You people should be busy with High Holy preparations. Are you losing your taste for work?"

"Now, now, Mr. Hart, that's a very unkind remark. I dislike this nonsense as much as anyone." His square jaw chewed into each word as he opened his scanning box. "It's the anti-social sabotage."

"Do you mean to say I am under suspicion?" Marie was now loitering in the doorway, worse luck.

"Oh, no. Nothing so insulting. This is strictly impersonal. The Scanning Center has picked apartments at complete random and we're to make spot checks."

The eye at one end of the box blinked wickedly, waiting for an information feed. "Now, sir, if you'll pardon me, I'll just take the records from one of those desk drawers—any drawer—and put them in the box." Hart slid open a drawer. "No, sir, I think I'll try the next one. It's regulation not to accept suggestions."

With a hand made deft by practise he scooped out all the sheets and tapes and put them in the box. The scanner's fingers rapidly sorted them past the eye. Hart exhaled, relieved that an innocuous drawer had been selected, and the inspector handed back the material to him. "Well, Inspector, that's that."

"Not quite." The Inspector selected another drawer at the other end of the desk and dumped everything before the scanner. His examination was speeding up and that was not good; he would have time to take more sample readings.

"Now if you'll empty your left pocket—"

O

h, this is too much!" Marie exploded. "My husband struggles all night on secret work, studying to find ways to stop the anti-socials, and you treat him like one of them!"

"You're working on the problem?" the Inspector said respectfully. "What are you doing?"

Frying pan to fire. Hart preferred the pan and pulled open a drawer. "It's too complicated, too much time needed to explain!"

The Inspector glanced at his watch. "I'm falling behind schedule." He closed up his box. "Sorry, but I have to leave. Heavy time sheet today."

As soon as he was gone, Hart breathed easier. Nothing incriminating would be fed into the Central Scanner.

Marie became apologetic. "I'm sorry I said it, Wendell, but I couldn't keep quiet. All I did last night was peek in once or twice."

He shrugged. "I'm just on a minor project."

"Every bit counts." She shook her head. "Only you have to wonder—I mean,

don't think I'm treasoning, but while I was shopping an hour ago a lot of women said you have to think—how come all that obsolescent junk could work so well, after being thoroughly wrecked, too? You almost wonder whether some of it was too good for disintegration."

Wendell pretended to be shocked. "Just a fluke of circumstance. If something like that happened again you'd be right to wonder. But it could not ever happen again."

"Don't get me wrong, Wendell. None of the women attacked anything. It was more like what you just said. They said if it happened again, then you'd have to wonder. But of course it couldn't happen again."

How well the tables had turned! Not only had Marie's ignorant knowledge proven helpful but she had now given him a positive idea also.

When he met Wright and Johnson at the latter's apartment that evening he explained it to them. "We can propagate 'dangerous' thoughts and yet appear completely loyal. We can set up the reaction to next High Holy Day."

"How?" demanded Johnson. "That's having your cake and eating it."

"Nothing's impossible in the human mind," Wright said. "Let's listen."

"Here's the point. Wherever you go there will be people tsk-tsking about the Preliminary fiasco. Just reassure them, say it meant nothing at all by itself. If it ever happened again, then there would be room for doubt but, of course, *it could not happen again!*"

Wright smiled. "That's almost feminine in its subtlety."

He smiled back. "My wife inspired it. Don't get nervous—it was unconscious, sheerly by accident."

"Whatever the cause, it's the perfect result," Johnson conceded. "We'll spread it through the net."

"Along with this, I hope." Wendell dumped the contacts on a table top. "It's the smallest size possible. A lot should get by unnoticed. Find cell members who can set up cryotrons with a wide range of instructions to cope with anything in the piles. Some weirdly alive concoctions of 'obsolescent' parts ought to result."

"Some day the world's going to know what you've done for it," said Johnson

solemnly.

"That could happen too soon!" Miss Wright's face, honest and open in its horse-like length, broke into a wide grin.

"Amen," said Hart, adding the private hope that Marie, blessed with superior looks, might be able to show as much superior wisdom some day.

T

he hope was not immediately fulfilled. When he reached home Marie was in a tizzy of excitement. "You're just in time, darling. They just caught three subversives. One of them was a woman," she added as this were compounding an improbability with an impossibility. "They're going to show them."

He gripped his belt tightly. "A woman?"

"That's right. There she is now."

A uniformed officer was gently helping a pale little old woman sit down before the camera, as if she were more an object of pity than of fear. Hart relaxed.

"—caught red-handed with the incriminating papers," shouted an offstage announcer. "Handbills asserting objects declared obsolescent could actually last indefinitely!"

"What do you have to say for yourself?" the officer asked gently. "You must realize, of course, that such irreligious behavior precludes your moving in general society for a long time to come."

"I don't know what came over me," she sobbed in a tired voice. "Curiosity. Yes, curiosity, that's what it was. I saw these sheets of paper in the street and they said we should stop working so hard at compulsory tasks and start working to expand our own interests and personalities."

"Self-contradictory nonsense!" said the voice.

"Yes, I know that. But it made me curious and I took it home to read, and it said our compulsory tasks were artificially manufactured and, if you didn't believe that, look at the pile that reactivated itself the other day." She stopped,

reorganizing her thoughts. "Of course, though, that thing in the Plaza was unique, you know. I don't think it could mean a thing ... unless it happened a few times. And the fact is it won't ever happen again."

"Well, that much makes very good sense," said Marie. "You said the same thing, Wendell. I don't think that poor woman knew what she was doing—just a dupe for subversive propaganda."

"—a dupe for subversive propaganda," the announcer was saying.

"See, exactly what I said."

"Yes, dear."

How swiftly the decentralized underground was working! Hart could not tell whether the old woman was an active member or just a passive responder, but it did not matter. She was now spreading the seeds for future doubt across the land.

Two old men were brought in and they mumbled the same disconnected story as their sister.

"We have intensively interrogated these prisoners," boomed the announcer, "and know there is nothing more to the rumored anti-social plot than this stupid chatter. Remain vigilant and you have nothing to fear!"

"You are sentenced to five years isolation from general society," said the officer, in a voice dulcet enough to sell advance orders for replacement products that had not yet been made. "Our intention is to protect you from bad influences. Our hope is that others will take your lesson to heart."

"God bless you," said the woman and her brothers joined in effusive thanks.

"Makes you proud to be a human being," Marie said. "I was getting some stupid doubts myself, dear. I must admit it. But that's all past. I can hardly wait for the Highest Holy Day."

"Neither can I," sighed her husband.

III

T

he next day at noon Eric came to him, functioning on the final set of servo instructions that had been installed in him at the factory of his birth eight years before. He shook hands with the two of them and said: "Now I am prepared for death."

Marie was tearful. "I will miss you, Eric. If you were only under five years old your span could be extended."

"Everything that happens is right," Eric said impassively.

He clambered on to the operation table, instinctively knowing which flat surface was for him, and, breaking all his major circuits, gave up the ghost that only man could restore to him.

Hart found his wife's grief easy to bear. The day after tomorrow she would join in the general exultation of High Holy Day, with Eric well forgotten. He methodically began smashing the surface of the limbs and torso; the greater the visible damage, the greater the honor redounding to the sacrifice donor. "This will be our gift to the general pile," he said.

"I thought we could keep him for our garden sacrifice," Marie protested meekly. "Most people do."

"But the other way is the greater sacrifice."

There was no reply, because she knew he spoke for the deeper, more moving custom. But suddenly he began to act depressed himself. "I know we say it every ten years, but Eric was really the best companion we ever had." He gestured toward the table. "I want to sit here with him for a while—alone."

"That's carrying things too far, Wendell. A little grief is proper—but this much is actually morbid."

"It's all within my rights."

She tossed her head petulantly. "Well, I've done my share. I can't stand any more.

It makes a person think and get depressed. I don't care what you're going to do. I'm going out to enjoy a Preliminary."

"Can't blame you for that," he nodded.

When she had gone he started to work on new instruction tapes for activating the servo-cryotron. Nothing could be surrendered to chance. Every possible circumstance in the pile had to be anticipated. There had to be instructions for action if Eric was crushed below fifty feet of metal, for assembling any kind of scrambled wiring, for adapting all types of parts in its immediate surroundings, for using these parts to absorb parts further away and for timing the operation to the start of the Highest Rite.

Some tapes had been prepared earlier, so it was possible to put everything in the cryotron box before Marie returned, as well as to attach the tiny contact that would reach out from the box until it reached its first external scrap of wire or metal.

"You poor darling," she pouted. "You missed the most wonderful thing! They demolished a whole thirty-story building!"

His blood, atavistically effected, pulsed faster until his new creed came to grips with his old emotions. "They usually don't bother with buildings for the Rites."

"I know—that's what was so wonderful! The State has decided to make this one the biggest Day of all time. We'll have enough work to fill the whole ten years! Everybody was so happy."

"I'm sure they were." He caught himself in mid-sarcasm and said, "I'm sorry I missed it."

"And I'm sorry I've been so selfishly self-centered." She frowned. "I forgot about it, but there were people in the crowd boasting they had been assigned to fight anti-social movements. I had to boast back that my husband had been honored too."

He tensed. "Oh? What did they say to that?"

"Frankly, they laughed."

"I should think so. The Central Scanner didn't pick up anything except a lot of ineffective propaganda. The sabotage business was all hysteria."

"That's just what they said—the assignments were an empty honor." She coldly considered Eric. "I want to wreck him too."

"I've smashed the insides," he said. "You'd better just work the surface."

"That's all I want to do," she answered, starting to scratch traditional marks all over the dead robot. It gave her a full afternoon of happy, busy labor.

T

he next day a large open truck came around and the street echoed to the appeal for contributions. Festival spirit was running high everywhere and when the neighborhood crowd saw the young robot porters carry Eric out there was a loud cheer of appreciation.

"My husband decided on a major contribution right away," Marie announced to them.

"It's the least we could do," he said modestly.

Many onlookers, swept away by their example, rushed indoors to bring out additional items of sacrifice. But only two others gave up their robots. The rest clung to them for private Holy Night ceremonies. Soon Eric disappeared under the renewed deluge of egg-beaters and washers.

"The best collection I have seen today," said the inspector accompanying the truck. "You people are to be congratulated for your exceptional patriotism."

"Destroy!" they shouted back joyously. "Make work!"

At dawn the Central Plaza was already crowded and new hordes kept pouring in from outlying areas. Wendell and his wife had been among the first to arrive. They waited, impatient in their separate ways, on the borderline five hundred yards from the ten-story pyre.

Martial music roared from loudspeakers, interrupted by the mellifluous boom of a merchandising announcer: "New product! Better models! One hundred years of High Holy Days! New! New! NEW!"

"Destroy!" came the returning shout. "Make work! Work! Work!"

All the sounds echoed back and forth until baffled away by the open area across the Plaza, where one large structure had already been destroyed. Three others were slated for collapse today.

"The biggest Holy Day ever," a restless old woman said to Marie. "I've seen all nine of them."

"Eric's in there," Marie chatted back, superficially sad, deeply happy.

"Who?"

"Our house robot."

"Imagine that! Did you hear that?" People gathered round them and cheered. The good-natured jostling continued until someone said: "Five minutes to go!"

Wendell checked his watch. Somewhere in the pile at least one element was coming to life, a metal arm reaching out for brother metal to engulf in its cybernetic sweep.

"They're coming!" A line of six shiny new slaggers came rumbling into the open with military precision. They moved along slowly, prolonging the pleasures of anticipation, then broke rank, each seeking its assigned point around the pile of appliances gathered for destruction.

"The latest improved models," said the loudspeakers. "They will first perform fifteen minutes of automatic maneuvers." The military music resumed and each slagger turned, as if circling a coin, in clanking rhythm to it.

"The three hundred and sixty degree turn. Next, making a box on the Plaza floor...."

The voice stopped, appalled.

A

n avalanche of metal slid down one side of the pile and the crowd gasped. The downward movement viscously slowed; then the metal, suddenly alive with the capacity to defy gravity, circled upward. Jagged limbs started flailing about.

"Disintegrator attack!" screamed the loudspeakers. "Attack!"

The maneuvers stopped. For one brief moment prior to changeover the Plaza was dead still, except for the deafening rumble in the pile. The slaggers broke the spell, rushing full speed toward the pile, evaporator beams working.

One by one they faltered and were sucked into the destructive pyre.

The crowd fell further back. The whole pile came alive like a mineral octopus. Then the squirming thing collapsed, every makeshift circuit irreparably broken and dead. Everything had been happening too fast for any pronounced reaction

to accompany it; but now the world went crazy.

"Stand firm!" pleaded the loudspeakers. "We will get reinforcements as soon as celebrations are finished elsewhere."

A barrage of enormous boos came from the disintegrating mob. "Never again! Fakes! It's finished, done for!"

"Stand firm!"

But the breakup down side avenues continued. "I don't understand," Marie shuddered. "Everything's crazy. We've been deceived, Wendell. Who's been deceiving us?"

"Nobody—unless it's ourselves."

"I don't understand that either." Saucer-eyed she watched a great clump of disgruntled people push past. "I *have* to think!"

Suddenly, as they came around a corner, they were facing Burnett.

Hart tried to disregard him but the group leader would have none of that. He rushed up to Hart. "Good to see a friendly face. Shocking developments!" His face was grim, but tiny wrinkles at the corners of his eyes betrayed an amusement that could only be discovered by those who looked for it.

"Mr. Burnett," he explained to Marie. "A librarian at the main building. Mr. Burnett, my wife Marie."

"I am most happy to meet you, Mrs. Hart. Have you heard the latest?"

"No, Mr. Burnett."

"The same things have been happening *everywhere*! They announced it on the radio and they're saying it's due to anti-social elements. Shocking!"

She shook her head stubbornly. "I don't know what to think. Maybe we shouldn't be shocked, maybe we should be. I just don't know, Mr. Burnett. I came to enjoy myself and look how it's ended." She bravely held back a sob, "Maybe we'd have been better off if we've never heard about High Holy Days!"

Burnett looked about with feigned apprehension. "You have to be careful what you say. The government says there's even talk—subversive handbills—about trying to rehabilitate some of the stuff in the piles."

"The government ought to keep quiet!" she exploded. "They said this couldn't happen. You can't believe anything they say any more. The *people* decide and the government will have to listen, that's what I say! And I'm a pretty typical person, not one of your intellectual kind. No criticism of present company intended."

"None taken, Mrs. Hart. Our human future," said Burnett, exchanging a grin with his aide, "remains, as it always has really been. Interesting—to say the least!"

Online Distributed Proofreading Team at <http://www.pgdp.net>

Updated editions will replace the previous one--the old editions
will be renamed.

Creating the works from public domain print editions means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg-tm electronic works to protect the PROJECT GUTENBERG-tm concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for the eBooks, unless you receive specific permission. If you do not charge anything for copies of this eBook, complying with the rules is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. They may be modified and printed and given away--you may do practically ANYTHING with public domain eBooks. Redistribution is subject to the trademark license, especially commercial redistribution.

*** START: FULL LICENSE ***

THE FULL PROJECT GUTENBERG LICENSE
PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg-tm mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase "Project Gutenberg"), you agree to comply with all the terms of the Full Project Gutenberg-tm License (available with this file or online at <http://gutenberg.org/license>).

Section 1. General Terms of Use and Redistributing Project Gutenberg-tm electronic works

1.A. By reading or using any part of this Project Gutenberg-tm electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg-tm electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg-tm electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. "Project Gutenberg" is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg-tm electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg-tm electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg-tm electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation ("the Foundation" or PGLAF), owns a compilation copyright in the collection of Project Gutenberg-tm electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is in the public domain in the United States and you are located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg-tm mission of promoting free access to electronic works by freely sharing Project Gutenberg-tm works in compliance with the terms of this agreement for keeping the Project Gutenberg-tm name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg-tm License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg-tm work. The Foundation makes no representations concerning the copyright status of any work in any country outside the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate

access to, the full Project Gutenberg-tm License must appear prominently whenever any copy of a Project Gutenberg-tm work (any work on which the phrase "Project Gutenberg" appears, or with which the phrase "Project Gutenberg" is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg License included with this eBook or online at www.gutenberg.org

1.E.2. If an individual Project Gutenberg-tm electronic work is derived from the public domain (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase "Project Gutenberg" associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg-tm trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg-tm electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg-tm License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg-tm License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg-tm.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg-tm License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg-tm work in a format other than "Plain Vanilla ASCII" or other format used in the official version posted on the official Project Gutenberg-tm web site (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original "Plain Vanilla ASCII" or other form. Any alternate format must include the full Project Gutenberg-tm License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg-tm works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg-tm electronic works provided that

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg-tm works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg-tm trademark, but he has agreed to donate royalties under this paragraph to the

Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."

- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg-tm License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg-tm works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg-tm works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg-tm electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from both the Project Gutenberg Literary Archive Foundation and Michael Hart, the owner of the Project Gutenberg-tm trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread public domain works in creating the Project Gutenberg-tm collection. Despite these efforts, Project Gutenberg-tm electronic works, and the medium on which they may be stored, may contain "Defects," such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the "Right of Replacement or Refund" described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg-tm trademark, and any other party distributing a Project Gutenberg-tm electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH F3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with

the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS' WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg-tm electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg-tm electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg-tm work, (b) alteration, modification, or additions or deletions to any Project Gutenberg-tm work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg-tm

Project Gutenberg-tm is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need, are critical to reaching Project Gutenberg-tm's goals and ensuring that the Project Gutenberg-tm collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg-tm and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation web page at <http://www.pglaf.org>.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Its 501(c)(3) letter is posted at <http://pglaf.org/fundraising>. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's principal office is located at 4557 Melan Dr. S.

Fairbanks, AK, 99712., but its volunteers and employees are scattered throughout numerous locations. Its business office is located at 809 North 1500 West, Salt Lake City, UT 84116, (801) 596-1887, email business@pglaf.org. Email contact links and up to date contact information can be found at the Foundation's web site and official page at <http://pglaf.org>

For additional contact information:

Dr. Gregory B. Newby
Chief Executive and Director
gbnewby@pglaf.org

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg-tm depends upon and cannot survive without wide spread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit <http://pglaf.org>

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg Web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: <http://pglaf.org/donate>

Section 5. General Information About Project Gutenberg-tm electronic works.

Professor Michael S. Hart is the originator of the Project Gutenberg-tm concept of a library of electronic works that could be freely shared with anyone. For thirty years, he produced and distributed Project Gutenberg-tm eBooks with only a loose network of volunteer support.

Project Gutenberg-tm eBooks are often created from several printed editions, all of which are confirmed as Public Domain in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our Web site which has the main PG search facility:

<http://www.gutenberg.org>

This Web site includes information about Project Gutenberg-tm, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
